# Global X MSCI China Consumer Discretionary ETF

Ticker: CHIQ Exchange: NYSE Arca

## INVESTMENT OBJECTIVE

The Global X MSCI China Consumer Discretionary ETF (the "Fund") seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI China Consumer Discretionary 10/50 Index (the "Underlying Index").

## FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares ("Shares") of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and examples below.**

**Annual Fund Operating Expenses** (expenses that you pay each year as a percentage of the value of your investment):

Management Fees:	0.65%
Distribution and Service (12b-1) Fees:	None
Other Expenses:	0.00%
<b>Total Annual Fund Operating Expenses:</b>	<b>0.65%</b>

**Example:** The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account customary brokerage commissions that you pay when purchasing or selling Shares of the Fund in the secondary market. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year	Three Years	Five Years	Ten Years
\$66	\$208	\$362	\$810

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 23.57% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund invests at least 80% of its total assets in the securities of the MSCI China Consumer Discretionary 10/50 Index (the "Underlying Index") and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Underlying Index. The Fund also invests at least 80% of its total assets in securities of consumer discretionary companies that are economically tied to China. For purposes of this policy, consumer discretionary companies include those companies that are classified in the consumer discretionary sector under the Global Industry Classification System ("GICS"). The Fund's 80% investment policies are non-fundamental and require 60 days prior written notice to shareholders before they can be changed. The Fund may lend securities representing up to one-third of the value of the Fund's total assets (including the value of the collateral received).

The Underlying Index tracks the performance of companies in the MSCI China Index (the "Parent Index") that are classified in the consumer discretionary sector, as defined by MSCI, Inc. ("MSCI") the provider of the Underlying Index (the "Index Provider"). The Parent Index is a free float-adjusted market capitalization-weighted index designed to measure the performance of securities that are classified as operating in China according to the MSCI Global Investable Markets Index Methodology, and that satisfy minimum market capitalization and liquidity thresholds. The securities eligible for inclusion in the Underlying Index include H-Shares (securities of companies incorporated in China that are denominated in Hong Kong Dollars and listed on the Hong Kong Stock Exchange (the "HKSE")), B-Shares (securities of companies

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

denominated in U.S. dollars or Hong Kong dollars and listed on Shanghai Stock Exchange (the "SSE") or Shenzhen Stock Exchange (the "SZSE"), Red Chips (securities of companies with a majority of their business operations in mainland China and that are controlled by the national government or local governments of China, traded on the HKSE in Hong Kong dollars), P-Chips (securities of companies with the majority of their business operations in mainland China and controlled by individuals in China, but that are incorporated outside of China), A-Shares (securities of companies incorporated in mainland China that trade on Chinese exchanges in renminbi) that are accessible through the Shanghai-Hong Kong Stock Connect program ("Shanghai Connect") or the Shenzhen-Hong Kong Stock Connect program ("Shenzhen Connect", and together with Shanghai Connect, "Stock Connect Programs"), and foreign listings such as American Depositary Receipts ("ADRs"). The Stock Connect Programs are securities trading and clearing programs that aim to achieve mutual stock market access between China and Hong Kong. Under Stock Connect, the Fund's trading of eligible A-shares listed on the SSE or the SZSE, as applicable, would be effectuated through its Hong Kong brokers. Trading through the Stock Connect Programs is subject to a daily quota, which limits the maximum net purchases under Stock Connect Programs each day, and as such, buy orders for A-shares would be rejected once the daily quota is exceeded (although the Fund will be permitted to sell A-shares regardless of the daily quota balance). The daily quota is not specific to the Fund. From time to time, other stock exchanges in China may participate in Stock Connect, and A-shares listed and traded on such other stock exchanges and accessible through Stock Connect may be added to the Underlying Index, as determined by MSCI.

The Underlying Index then follows a rules-based methodology that is designed to select all constituents of the Parent Index that are classified in the consumer discretionary sector under the GICS. The Underlying Index is weighted according to each component's free float adjusted market capitalization, but is modified so that, as of the rebalance date, no group entity (defined by the Index Provider as companies with a controlling stake owned by one entity) constitutes more than 10% of the Underlying Index and so that, in the aggregate, the individual group entities that would represent more than 5% of the Underlying Index represent no more than 50% of the Underlying Index ("10/50 Cap"). The Underlying Index is reconstituted and re-weighted quarterly. The Underlying Index may include large- and mid-capitalization companies. As of December 31, 2025, the Underlying Index had 57 constituents. The Fund's investment objective and Underlying Index may be changed without shareholder approval.

The Fund generally will use a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Underlying Index in approximately the same proportions as in the Underlying Index. However, the Fund may utilize a representative sampling strategy with respect to the Underlying Index when a replication strategy might be detrimental or disadvantageous to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to replicate the Underlying Index, in instances in which a security in the Underlying Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Underlying Index. The Fund will not invest in investment companies or other pooled investment vehicles, except for limited investment in money market funds utilized for cash management purposes in the ordinary course of business, which money market funds will not exceed 10% of Fund assets.

The Adviser expects that, over time, the correlation between the Fund's performance and that of the Underlying Index, before fees and expenses, will exceed 95%. A correlation percentage of 100% would indicate perfect correlation. If the Fund uses a replication strategy, it can be expected to have greater correlation to the Underlying Index than if it uses a representative sampling strategy.

The Fund concentrates its investments (i.e., holds 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. As of December 31, 2025, the Underlying Index was concentrated in the automobiles and broadline retail industries and had significant exposure to the consumer discretionary sector. The Fund is classified as "non-diversified," which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund.

## SUMMARY OF PRINCIPAL RISKS

As with any investment, you could lose all or part of your investment in the Fund, and the Fund's performance could trail that of other investments. There is no guarantee that the Fund will achieve its investment objective. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, the Adviser or any of its affiliates. The Fund is subject to the principal risks noted below, any of which may adversely affect the Fund's net asset value ("NAV"), trading price, yield, total return and ability to meet its investment objective, as well as other risks that are described in greater detail in the **Additional Information About the Funds** section of the Fund's Prospectus and in the Statement of Additional Information ("SAI").

**Asset Class Risk:** Securities and other assets in the Underlying Index or otherwise held in the Fund's portfolio may underperform in comparison to the general securities markets, a particular securities market or other asset classes.

**China A-Shares Risk:** A-Shares are issued by companies incorporated in mainland China and are traded on Chinese exchanges. Foreign investors can access investments in A-Shares by obtaining a Qualified Foreign Institutional Investor ("QFII") or a Renminbi

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

Qualified Foreign Institutional Investor ("RQFII") license, as well as through the Stock Connect Program, which is a securities trading and clearing program with an aim to achieve mutual stock market access between the China and Hong Kong markets. Stock Connect was developed by Hong Kong Exchanges and Clearing Limited, the Shanghai Stock Exchange ("SSE") (in the case of Shanghai Connect) or the Shenzhen Stock Exchange ("SZSE") (in the case of Shenzhen Connect), and the China Securities Depository and Clearing Corporation Limited ("CSDCC"). The Fund currently intends to gain exposure to A-Shares through the Stock Connect Programs. The markets on which A-Shares trade are considered emerging markets characterized by generally low trading volume and less market liquidity due to various factors. For example, investments in A-Shares are subject to various regulations and limits, and the recoupment or repatriation of assets invested in A-Shares is subject to restrictions imposed by the Chinese government. In addition, investors from outside mainland China may face difficulties or prohibitions accessing certain A-Shares that are part of a restricted list in countries such as the U.S. A-Shares may also be subject to frequent and widespread trading halts, which can increase pricing volatility and cause the A-Shares to become illiquid. Trading suspensions in certain stock could lead to greater market execution, clearing and settlement risks and costs for the Fund, and the creation and redemption of Creation Units (as defined below) may also be disrupted. These risks, among others, could adversely affect the value of the Fund's investments.

**Depository Receipts Risk:** The Fund may invest in depository receipts, such as ADRs and GDRs. Depository receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Depository receipts are generally subject to the same risks associated with direct investments in the securities of foreign companies. A holder of depository receipts may also be subject to fees and the credit risk of the financial institution acting as depository. Unsponsored depository receipts may involve higher expenses, fewer shareholder rights, and may be less liquid.

**Equity Securities Risk:** Equity securities are subject to changes in value, and their values may be more volatile than other asset classes, as a result of a company's business performance, investor perceptions, stock market trends and general economic conditions.

**Capitalization Risk:** Investing in issuers within the same market capitalization category carries the risk that the category may be out of favor due to current market conditions or investor sentiment.

**Large-Capitalization Companies Risk:** Large-capitalization companies may adapt more slowly to new competitive challenges and changing market conditions than smaller capitalization companies. In addition, large-capitalization companies may be more mature and subject to more limited growth potential and consequently may underperform other segments of the equity market or the market as a whole.

**Mid-Capitalization Companies Risk:** Mid-capitalization companies may have greater price volatility, lower trading volume and less liquidity than large-capitalization companies. In addition, mid-capitalization companies may have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies. These securities may have returns that vary, sometimes significantly, from the overall securities market.

**Currency Risk:** The Fund may invest in securities denominated in foreign currencies. Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if currencies of the underlying securities depreciate against the U.S. dollar or if there are delays or limits on repatriation of such currencies. Generally, an increase in the value of the U.S. dollar against a foreign currency will reduce the value of a security denominated in that foreign currency, thereby decreasing the Fund's NAV. Exchange rates may be volatile and may change quickly and without warning, which could have a significant negative impact on the Fund.

**Custody Risk:** Custody risk refers to the risks in the process of clearing and settling trades, as well as the holding of securities and other assets by local banks, agents, and securities depositories. These risks are heightened in jurisdictions with less developed markets or less robust settlement and custody infrastructure and processes.

**Cybersecurity Risk:** With the increased use of technologies such as the Internet to conduct business, the Fund, like all companies, may be susceptible to operational, information security and related risks. Cybersecurity incidents involving the Fund and its service providers (including, without limitation, the Adviser, fund accountant, custodian, transfer agent and financial intermediaries) have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, impediments to trading, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs.

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

**Focus Risk:** The Fund may from time to time have a significant amount of its assets invested in a particular industry, group of industries, or one or more sectors to approximately the same extent that the Underlying Index focuses in investments related to a particular industry, group of industries, and/or one or more sectors. In such event, the Fund's performance will depend to a greater extent on the overall condition of such industry(ies) or sector(s), and an economic, business, political, regulatory, or other occurrence affecting such industry(ies) or sector(s) will have an increased impact on the value of the Fund's shares compared to the value of shares of a fund that invests in a broader range of industries or sectors.

**Risks Related to Investing in the Automobiles Industry:** The automobiles industry can be highly cyclical, and companies in the industry may suffer periodic operating losses. The industry can be significantly affected by labor relations and fluctuating component prices. While most of the major manufacturers are large, financially strong companies, many others are small and can be non-diversified in both product line and customer base. Additionally, developments in automotive technologies (e.g., autonomous vehicle technologies) may require significant capital expenditures that may not generate profits for several years, if any. Governmental policies affecting the automotive industry, such as taxes, tariffs, duties, subsidies, and import and export restrictions on automotive products can influence industry profitability.

**Risks Related to Investing in the Broadline Retail Industry:** Companies in the internet and direct marketing retail industry are dependent on internal infrastructure and on the availability, reliability and security of the internet and related systems. Critical systems and operations may be vulnerable to damage or interruption from fire, flood, power loss, telecommunications failure, terrorist attacks, cyber-attacks, acts of war, break-ins, earthquake and similar events. Any system interruption that results in the unavailability of a company's website or mobile app or reduced performance of transaction systems could interrupt or substantially reduce a company's ability to conduct its business. Companies in the internet and direct marketing retail industry are dependent on paid and unpaid natural search engines and are therefore dependent on business decisions made by companies that offer natural search engines. Any business changes by dominant providers of natural search engines can be detrimental to an internet and direct marketing retail company's business while being totally outside of the control of such company.

**Risks Related to Investing in the Consumer Discretionary Sector:** The consumer discretionary sector may be affected by changes in domestic and international economies, exchange and interest rates, inflation, competition, consumers' disposable income and consumer preferences, social trends and marketing campaigns.

**Foreign Securities Risk:** Investments in foreign securities can be riskier than U.S. securities investments. Investments in the securities of foreign issuers (including investments in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs")) are subject to additional risks, including lower levels of liquidity and market efficiency; greater securities price volatility; exchange rate fluctuations and exchange controls; less availability of public information about issuers; limitations on foreign ownership of securities; imposition of withholding or other taxes; imposition of restrictions on the expatriation of the assets of the Fund; restrictions placed on U.S. investors by U.S. regulations governing foreign investments; higher transaction and custody costs and delays in settlement procedures; difficulties in enforcing contractual obligations; lower levels of regulation of the securities market; weaker accounting, disclosure and reporting requirements; and legal principles relating to corporate governance and directors' fiduciary duties and liabilities. The countries in which the Fund invests may also be subject to structural risks, including economic, political and social instability. Additionally, certain securities held by the Fund, while traded on U.S. exchanges, may be issued by foreign financial institutions and as such, may be subject to the risks of investing in securities issued by foreign companies, which may not be subject to the same regulations as companies domiciled in the U.S. Where all or a portion of the Fund's securities trade in a market that is closed when the market in which the Fund's Shares are listed and trading is open, there may be differences between the last quote from the security's closed foreign market and the value of the security during the Fund's domestic trading day. This, in turn, could lead to differences between the market price of the Fund's Shares and the underlying value of those shares.

**Geographic Risk:** The Fund's investments in securities of issuers located in a particular country or geographic region may subject the Fund to certain risks to a greater extent than if its investments were less focused, including: natural, biological or other disasters and the spread of infectious diseases; economic, political and social instability; security concerns; and trade disputes with key trading partners. The securities in which the Fund invests and, consequently, the Fund are also subject to specific risks as a result of their business operations in a particular country or region, including, but not limited to:

**Risk of Investing in China:** Investments in Chinese securities may subject the Fund to legal, regulatory, political, currency, security, and economic risks specific to China. China may be subject to considerable degrees of economic, political and social instability. Concerns about the rising government and household debt levels could impact the stability of the Chinese economy. Despite economic and market reform in recent decades, the Chinese government's control over certain sectors and enterprises and significant regulation of investment and industry are pervasive. Chinese companies are subject to the risk that Chinese authorities

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

can intervene in their operations and structure. Internal social unrest or confrontations with other countries, including military conflicts in response to such events, may disrupt economic development in China and result in a greater risk of currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation.

The Chinese economy is highly reliant on trade. Reduction in spending on Chinese products and services, institution of additional tariffs or other trade barriers (including as a result of heightened trade tensions between China and the U.S. or in response to actual or alleged Chinese cyber activity), or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy.

China has experienced security concerns, such as terrorism and strained international relations. Additionally, China is alleged to have participated in state-sponsored cyberattacks against foreign companies and foreign governments. Actual and threatened responses to such activity, including purchasing restrictions, sanctions, tariffs or cyberattacks on the Chinese government or Chinese companies, may impact China's economy and Chinese issuers in which the Fund invests. Incidents involving China's or the region's security may adversely affect the Chinese economy and the Fund's investments. Chinese companies, including those listed on U.S. exchanges, are not subject to the same degree of regulatory requirements, accounting standards or auditor oversight as companies in more developed countries, and as a result, information about the Chinese securities in which the Fund invests may be less reliable or complete. There may be significant obstacles to obtaining information necessary for investigations into or litigation against Chinese companies and shareholders may have limited legal remedies. Investments in China may be subject to loss due to expropriation, nationalization, confiscation of assets and property, and or the imposition of restrictions on foreign investments and repatriation of capital. In addition, many Chinese companies listed on U.S. exchanges use variable interest entities ("VIEs") in their structure as a result of foreign ownership restriction. Any change in the operations of entities in a VIE structure, the status of VIE contractual arrangements or the legal or regulatory environment in China could result in significant, and possibly permanent and/or total, losses for investments in VIE issuers.

**Risk of Investing in Emerging Markets:** Investments in emerging markets may be subject to a greater risk of loss than investments in developed markets. Securities markets of emerging market countries are less liquid, subject to greater price volatility, have smaller market capitalizations, have less government regulation, and are not subject to as extensive and frequent accounting, financial, and other reporting requirements as the securities markets of more developed countries, and there may be greater risk associated with the custody of securities in emerging markets. It may be difficult or impossible for the Fund to pursue claims against an emerging market issuer in the courts of an emerging market country. There may be significant obstacles to obtaining information necessary for investigations into or litigation against emerging market companies and shareholders may have limited legal rights and remedies. Emerging markets may be more likely to experience inflation, political turmoil and rapid changes in economic conditions than more developed markets. Emerging markets may also face other significant internal or external risks, including the risk of war, terrorism, or other social or political conflicts.

**Government Debt Risk:** Countries with high levels of public debt and spending may experience stifled economic growth. Such countries may face higher borrowing costs and, in some cases, may implement austerity measures that could have an adverse effect on economic growth. Such developments could contribute to prolonged periods of recession and adversely impact investments in the Fund.

**Indexing Strategy Risk:** The Fund is not actively managed, and the Adviser does not attempt to take defensive positions in declining markets or seek to outperform its Underlying Index. Therefore, the Fund would not necessarily buy or sell a security unless that security is added or removed, respectively, from the Underlying Index, even if that security generally is underperforming. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the Fund's return to be lower than if the Fund employed an active strategy.

**Index-Related Risk:** There is no guarantee that the Fund will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations and/or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

**Management Risk:** The Fund may not fully replicate its Underlying Index and may hold securities not included in its Underlying Index. The Adviser's investment strategy, the implementation of which is subject to a number of constraints, may cause the Fund to underperform the market or its relevant benchmark or adversely affect the ability of the Fund to achieve its investment objective.

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

**Tracking Error Risk:** Tracking error may occur because of differences between the instruments held in the Fund's portfolio and those included in the Underlying Index, pricing differences, transaction costs incurred by the Fund, the Fund's holding of uninvested cash, size of the Fund, differences in timing of the accrual of or the valuation of dividends or interest, tax gains or losses, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. ETFs that track indices with significant weight in emerging markets issuers may experience higher tracking error than other ETFs that do not track such indices.

**International Closed Market Trading Risk:** To the extent that the underlying investments held by the Fund trade on foreign exchanges that may be closed when the securities exchange on which the Fund's Shares trade is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market). These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds ("ETFs").

**Issuer Risk:** Fund performance depends on the performance of individual companies in which the Fund invests. Changes to the financial condition of any of those companies may cause the value of such company's securities to decline.

**Market Risk:** Turbulence in the financial markets and reduced liquidity may negatively affect issuers, which could have an adverse effect on the Fund and its investments. The Fund's NAV could decline over short periods due to short-term market movements and over longer periods during market downturns. Trade policy, including the imposition of tariffs, may dampen consumer spending and result in decreased confidence in the markets. Additionally, political uncertainty regarding U.S. policy, including the U.S. government's approach to trade, may also impact the markets. Furthermore, local, regional or global events such as war, acts of terrorism, the spread of infectious diseases, inflation and recessions, changes in interest or exchange rates, or other events could have a significant impact on the Fund and its investments and trading of its Shares. Market risk factors may result in increased volatility and/or decreased liquidity in the securities markets.

**Non-Diversification Risk:** The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940 ("1940 Act"), which means that the Fund may invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Operational Risk:** The Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes, cyber security incidents, and technology or systems failures. The Fund and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

**Risks Associated with Exchange-Traded Funds:** As an ETF, the Fund is subject to the following risks:

**Authorized Participants Concentration Risk:** The Fund has a limited number of financial institutions that may act as Authorized Participants and engage in creation or redemption transactions directly with the Fund, and none of those Authorized Participants is obligated to engage in creation and/or redemption transactions. To the extent that those Authorized Participants exit the business or are unable to process creation and/or redemption orders, such as in times of market stress, Shares may be more likely to trade at a premium or discount to NAV and/or at wider intraday bid-ask spreads, and possibly face trading halts and/or delisting from an exchange. Authorized Participants Concentration Risk may be heightened because the Fund invests in non-U.S. securities.

**Large Shareholder Risk:** Certain shareholders, including an Authorized Participant, the Adviser, an affiliate of the Adviser, or funds managed by the Adviser, may own a substantial amount of the Fund's Shares. Redemptions by large shareholders could have a significant negative impact on the Fund. If a large shareholder were to redeem all, or a large portion, of its Shares, there is no guarantee that the Fund will be able to maintain sufficient assets to continue operations in which case the Board of Trustees may determine to liquidate the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on a national securities exchange and may, therefore, have a material upward or downward effect on the market price of the Shares.

**Listing Standards Risk:** The Fund is required to comply with listing requirements adopted by the listing exchange. Non-compliance with such requirements may result in the Fund's shares being delisted by the listing exchange. Any resulting liquidation

**GO PAPERLESS**

Sign up now for eDelivery of fund documents from Global X Funds at [www.icsdelivery.com](http://www.icsdelivery.com)

of the Fund could cause the Fund to incur elevated transaction costs and could result in negative tax consequences for its shareholders.

**Market Trading Risks and Premium/Discount Risks:** Shares of the Fund are publicly traded on a national securities exchange, which may subject shareholders to numerous market trading risks. In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares, as well as disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of assets in the Fund or an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings. The trading price of the Fund's Shares fluctuates, in some cases materially, throughout trading hours in response to changes in the Fund's NAV.

**Risks Related to Stock Connect Programs:** A Fund may purchase shares in mainland China-based companies that trade on Chinese stock exchanges ("China A-Shares") through the Shanghai-Hong Kong Stock Connect program and Shenzhen-Hong Kong Stock Connect program ("the Stock Connect Programs"). Trading through the Stock Connect Programs is subject to a number of restrictions, including daily and aggregate quota limitations, which may restrict or preclude the Fund's ability to enter into and exit Stock Connect positions on a timely basis. The Shenzhen and Shanghai markets may operate when the Stock Connect Programs are not active, and consequently the prices of shares held via Stock Connect Programs may fluctuate at times when the Fund is unable to add to or exit its positions. The Stock Connect Programs are relatively new trading platforms, and the effect of the introduction of large numbers of foreign investors on the market for trading Chinese-listed securities is not yet well understood. Further developments to the Stock Connect Programs are likely and there can be no assurance as to whether or how such developments may restrict or affect the Fund's investments or returns. Regulations, such as limitations on redemptions or suspension of trading, may adversely impact the Stock Connect Programs and in turn, adversely impact the value of the Fund's investments. The Fund's investments in A-Shares through the Stock Connect Program are held by its custodian in accounts in Central Clearing and Settlement System ("CCASS") maintained by the Hong Kong Securities Clearing Company Limited ("HKSCC"), which in turn holds the A-Shares, as the nominee holder, through an omnibus securities account in its name registered with the CSDCC. The precise nature and rights of the Fund as the beneficial owner of the SSE Securities or SZSE Securities through HKSCC as nominee is not well defined under Chinese law. There is no guarantee that the Shenzhen, Shanghai, and Hong Kong Stock Exchanges will continue to support the Stock Connect Programs in the future.

**Securities Lending Risk:** Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund is not able to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Additionally, the Fund will bear any loss on the investment of cash collateral it receives. These events could also trigger adverse tax consequences for the Fund. As securities on loan may not be voted by the Fund, there is a risk that the Fund may not be able to recall the securities in sufficient time to vote on material proxy matters.

**Trading Halt Risk:** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

**Valuation Risk:** The sales price the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Underlying Index, particularly for securities that trade in low value or volatile markets or that are valued using a fair value methodology (such as during trading halts). The value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares.

## PERFORMANCE INFORMATION

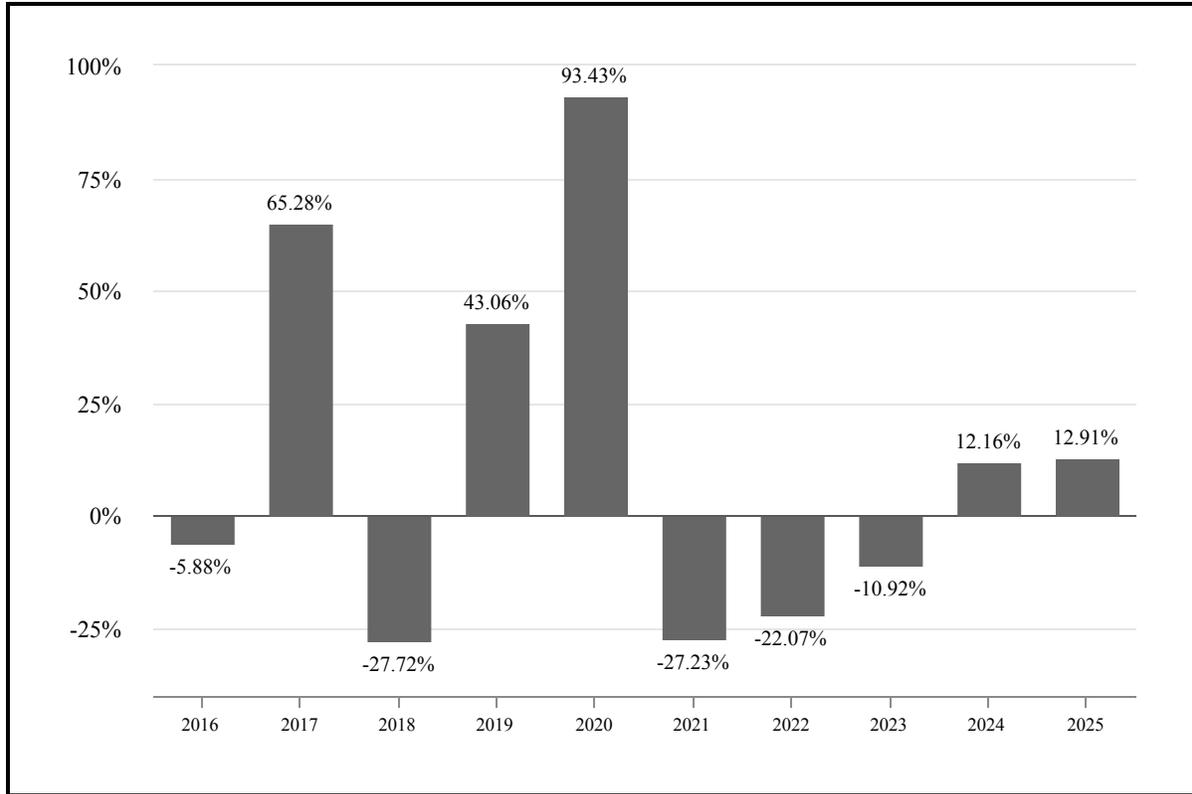

The bar chart and table that follow show how the Fund performed on a calendar year basis and provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the indicated periods compare with the Fund's broad-based benchmark index, which reflects a broad measure of market performance, and the Underlying Index, which the Fund seeks to track. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.globalxetfs.com](http://www.globalxetfs.com).

## Average Annual Total Returns (for the Periods Ended December 31, 2025)

	One Year Ended December 31, 2025	Five Years Ended December 31, 2025	Ten Years Ended December 31, 2025
<b>Global X MSCI China Consumer Discretionary ETF:</b>			
·Return before taxes	12.91%	-8.54%	7.13%
·Return after taxes on distributions <sup>1</sup>	12.41%	-8.96%	6.69%
·Return after taxes on distributions and sale of Fund Shares <sup>1</sup>	7.81%	-6.35%	5.60%
<b>MSCI Emerging Markets Index (net) (USD)</b>			
(Index returns reflect invested dividends net of withholding taxes, but reflect no deduction for fees, expenses, or other taxes)	33.57%	4.20%	8.42%
<b>MSCI China Consumer Discretionary 10/50 Index (net)<sup>2</sup></b>			
(Index returns reflect invested dividends net of withholding taxes, but reflect no deduction for fees, expenses, or other taxes)	13.56%	-8.06%	7.77%

<sup>1</sup> After-tax returns are calculated using the historical highest individual U.S. federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown above. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts (IRAs).

<sup>2</sup> Performance reflects the performance of the Solactive China Consumer Total Return Index through December 5, 2018, and the MSCI China Consumer Discretionary 10/50 Index thereafter.

### FUND MANAGEMENT

**Investment Adviser:** Global X Management Company LLC.

**Portfolio Managers:** The professionals primarily responsible for the day-to-day management of the Fund are Nam To, CFA and Wayne Xie ("Portfolio Managers"). Mr. To has been a Portfolio Manager of the Fund since March 1, 2018. Mr. Xie has been a Portfolio Manager of the Fund since March 1, 2019.

### PURCHASE AND SALE OF FUND SHARES

Shares of the Fund are or will be listed and traded at market prices on a national securities exchange. Shares may only be purchased and sold on the exchange through a broker-dealer. The price of Shares is based on market price, and because ETF shares trade at market prices rather than at NAV, Shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). Only "Authorized Participants" (as defined in the SAI) who have entered into agreements with the Fund's distributor, SEI Investments Distribution Co. ("Distributor"), may engage in creation or redemption transactions directly with the Fund. The Fund will only issue or redeem Shares that have been aggregated into blocks called Creation Units. The Fund will issue or redeem Creation Units in return for a basket of cash and/or securities that the Fund specifies any day that the national securities exchanges are open for business ("Business Day"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). To access information regarding the Fund's net asset value, market price, premiums and discounts, and bid-ask spreads, please go to <https://www.globalxetfs.com>.

### TAX INFORMATION

The Fund intends to make distributions that may be taxable to you as ordinary income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account ("IRA"), in which case distributions from such tax-advantaged arrangement may be taxable to you.

## **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer, sales persons or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
