

REASONS TO CONSIDER

**High Growth Potential**

Copper consumption could reach 43M metric tonnes by 2050, up from 26M in 2022. However, supply may not keep up with demand, which could present opportunities for miners.⁽¹⁾

**Structural Tailwinds**

Copper is an essential input in electric vehicles, renewable energy storage, and other forms of next-generation infrastructure that we expect to gain popularity.

**ETF Efficiency**

In a single trade, COPX delivers efficient access to a basket of companies involved in the mining of copper.

Freeport-mcmoran Inc	4.85%	Bhp Group Ltd	4.49%

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized.

COUNTRY BREAKDOWN (%)

* Germany 3.37%, Hong Kong 2.56%, Saudi Arabia 0.98%, Cyprus 0.73%

All Sector, Industry and Geographic breakdowns, where provided, are based on equity positions held by the ETF and exclude cash, currencies, and other holdings.

DEFINITIONS

Solactive Global Copper Miners Total Return Index

The Solactive Global Copper Miners Total Return Index is designed to reflect the performance of the copper mining industry. It is comprised of selected companies globally that are actively engaged in some aspect of the copper mining industry, such as copper mining, refining, or exploration.

(1) BloombergNEF, Jun 2023

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments may be subject to higher volatility. There are additional risks associated with investing in copper and the copper mining industry. COPX is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
