What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Global X SuperDividend [®] U.S. ETF	\$51	0.45%

How did the Fund perform in the last year?

The Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Indxx SuperDividend[®] U.S. Low Volatility Index ("Secondary Index"). The Fund is passively managed, which means the investment adviser does not attempt to take defensive positions in declining markets. The Fund generally seeks to fully replicate the Secondary Index.

The Secondary Index is maintained by Indxx, LCC (the "Index Provider"). The Secondary Index tracks the performance of 50 equally weighted common stocks, Master Limited Partnerships and real estate investment trusts ("REITs") that rank among the highest dividend yielding equity securities in the United States, as defined by the Index Provider. The components of the Secondary Index will have also paid dividends consistently over the last two years. The Secondary Index is comprised of securities that the Index Provider determines to have lower volatility relative to the market.

For the 12-month period ended October 31, 2024 (the "reporting period"), the Fund increased 26.21%, while the Secondary Index increased 26.94%. The Fund had a net asset value of \$15.62 per share on October 31, 2023 and ended the reporting period with a net asset value of \$18.50 per share on October 31, 2024.

During the reporting period, the highest returns came from Virtu Financial, Inc. Class A and International Paper Company, which returned 75.17% and 72.61% respectively. The worst performers were Flagstar Financial, Inc. and Frontline Plc, which returned -48.03% and -27.45%, respectively.

During the reporting period, the Fund reported positive performance. The Fund's high dividend strategy fared well during the reporting period as interest rate tailwinds kicked in and improved the relative attractiveness of dividend paying equities versus bonds. Dovish expectations on interest rate policy boosted investor sentiment and encouraged market participation which drove positive performance, particularly among rate sensitive sectors such as Real Estate (which includes REITs), Financials, and Utilities. Overall, the Fund's equal-weighting methodology helped ensure a more balanced approach to capturing the broad-based strength of high dividend paying stocks during the reporting period. During the reporting period, by sector, the Fund had the highest exposure to Financials at 28.00% and Energy at 22.56%.
