

## REASONS TO CONSIDER

### PureCap<sup>SM</sup> Sector Exposure

Traditional sector ETFs often cap the weights of the largest individual stocks. GXPD seeks to offer pure exposure to the Consumer Discretionary sector and allow the Fund to reflect the sector's actual composition.

### Precision Building Block

GXPD offers transparent Consumer Discretionary exposure, giving investors clarity of their allocations for greater precision in managing their portfolio.

### ETF Efficiency

GXPD delivers uncapped Consumer Discretionary exposure in a single trade with the tax efficiency potential, liquidity, and systematic rebalancing of a passive ETF.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
