What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Global X SuperDividend [®] ETF	\$64	0.58%

How did the Fund perform in the last year?

The Fund seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Global SuperDividend[®] Index ("Secondary Index"). The Fund is passively managed, which means the investment adviser does not attempt to take defensive positions in declining markets. The Fund generally seeks to fully replicate the Secondary Index.

The Secondary Index tracks the performance of 100 equally weighted companies that rank among the highest dividend yielding equity securities in the world, including emerging market countries, as defined by Solactive AG, the provider of the Secondary Index ("Index Provider"). The Index Provider applies certain dividend stability filters.

For the 12-month period ended October 31, 2024 (the "reporting period"), the Fund increased 20.42%, while the Secondary Index increased 21.35%. The Fund had a net asset value of \$20.36 per share on October 31, 2023 and ended the reporting period with a net asset value of \$21.99 per share on October 31, 2024.

During the reporting period, the highest returns came from Yue Yuen Industrial (Holdings) Limited and SL Green Realty Corp., which returned 117.03% and 76.86% respectively. The worst performers were B. Riley Financial, Inc. and Service Properties Trust, which returned -46.18% and -37.46%, respectively.

During the reporting period, the Fund reported positive performance. The Fund's focus on companies with high dividend payments proved advantageous in a period of strong economic conditions. The U.S. Federal Reserve's decision to cut interest rates in September 2024 also positively impacted the Fund as high-yield dividend stocks became more attractive relative to some fixed-income investments. This monetary easing, which extended globally, has supported rate-sensitive sectors in which the Fund is invested, such as the Energy, Financials, and Real Estate Investment Trusts (REITs) sectors. These factors combined to contribute to the Fund's positive performance during the reporting period. During the reporting period, by sector, the Fund had the highest exposure to Financials at 28.00% and Energy at 22.56%. By country, the Fund had the highest exposure to United States at 34.77% and China at 9.42%.
